Significance

Briefly describe the structure or site's significance:

102 S. Main Street ca. 1851 PIVOTAL Contribution

Two-story brick building, laid up in common bond, built for Hannah and McLean Trading Company ca. 1851. The oversized bricks were reportedly made on site, sun dried and that several bricks have finger impressions that still remain. The building features two-panel doors with simple molded frames and a porch which carries across the entire front (west) elevation supported by cast iron columns with decorative capitals. Originally a three-story building, the top floor was destroyed by Hurricane Hazel in 1954. It is worth noting that the third floor was not rebuilt until the year 2000. Sash is 6/6.

When Hannah and McLean went out of business in 1857 the building was sold to James D. Bason for retail businesses. Then in 1892 the property was again sold to W. J. Nicks. Nicks expanded the building and sealed off the second floor for use as his residence. The third floor was rented out for various meetings, etc. The basement was converted into a dining room for guests during court week and an annex was added to the rear that housed a kitchen on the first floor, an office on the second, and a bedroom on the third. Another two-story addition on the south side of the store was rented to Sing Lee for the town's first Chinese laundry.

Nicks died in 1952, but the business continued to be operated by members of his family until 1964.

By 1914, the store of W. J. Nicks was already a landmark in Graham.

National Register of Historic Places Inventory - Nomination Form March 10 1983

The building entrances were intentionally built elevated above street level so that the livestock that frequented the square would not find their way in. This is one of the few pre-Civil War antebellum commercial buildings remaining in the state.

This application must be accompanied by a report on the

historic, architectural, prehistorical, educational or cultural significance of each building, structure, site, area or object proposed for designation. The report shall include the suggested minimum standards set forth by the State Historic

Preservation Office.
