

U-6017 PUBLIC INFORMATION MEETING

* MAY 24, 2023 3P-5P, GRAHAM CITY HALL- 201 S. MAIN STREET*

An information meeting by the City of Graham and N.C. Department of Transportation will be held Wednesday May 24th from 3pm-5pm about a proposed roundabout in Graham. The purpose of the project is to improve traffic operations and pedestrian accessibility to the intersection of N.C. 54 (East Harden Street) at N.C. 49 (East Elm Street).

The N.C. Department of Transportation proposes that these improvements would:

- replace the existing signalized intersection with a hybrid roundabout intersection
- provide 12-foot travel lanes
- provide a dual left-turn through the roundabout for the southbound East Elm Street to eastbound East Harden Street movement
- add a dedicated right turn “slip lane” for westbound East Harden Street, allowing free flow movement through the roundabout for traffic heading north on East Elm Street
- provide 5-foot sidewalks on both sides of East Harden Street and East Elm Street throughout the extent of the project
- provide pedestrian crosswalks

To reduce vehicle conflicts near the intersection, the existing connection between Walker Avenue and East Elm Street would be eliminated.
